

NETmc Marine announces record end to 2008

2009-02-23 10:00:00 by jamesmc

“NETmc Marine, designers and manufacturer’s of a range of digital video recorders and video overlays for the offshore market, is please to announce a record end to 2008.It was a bumper year in general however December was outstanding with orders received for over 30 digital video recorders and 15 video overlays alone from both existing and new customers. 2008 saw NETmc Marine appoint it’s first reseller, [ROV World Lda](#) in Portugal, of it’s 73fifty Peli product; designed with the small ROV market and coastal diver sector in mind, this has already proven fruitful as ROV World has already taken delivery of two systems.

We also saw our customer base expand with several new clients in the USA, Italy, Canada, Portugal and France. With several months worth of advance orders for 2009 NETmc Marine is looking forward to a very busy year.”
