

## Paine Electronics releases new subsea pressure transmitter

2010-05-31 12:00:00 by Rons\_ROV\_Links

Paine Electronics, LLC announces that the the 214-35-500 series pressure transmitter for subsea applications is now available with a Sea Con® XSEE-3-BCR bulkhead connector.

Offered in pressure ranges from 0-1,000 to 0-20,000 PSIA, 4-20 mA output and operating at temperatures from -65°F to +230°F (-53°C to +110°C) the 214-35-500 Series provides maintenance free performance in the toughest applications.

- Static Error Band:  $\pm 0.50\%$  of the full scale output
- Thermal Zero Shift: 0.01% of full scale per °F.
- Thermal Sensitivity Shift: 0.01% of full scale per °F.
- Zero Pressure Output:  $4.00 \pm 0.16$  mA.
- Output at Full Scale Pressure:  $20.00 \pm 0.16$  mA.
- 10,000 PSI external case pressure.
- Reverse Polarity Protection.
- All-welded, High Corrosion Resistant Alloys.

The 214-35-500 Series can be customized with alternate connectors, mounting and pressure port configurations to meet customer project needs.
