

## C & C Technologies opens West Coast Division

2010-07-26 10:00:00 by Rons\_ROV\_Links

C & C Technologies, Inc. (C & C), an international surveying and mapping company, is pleased to announce the opening of its West Coast Division and its appointment of Richard McGee as its West Coast Division Manager.

C & C's West Coast Division is staffed with eight experienced staff members based near Seattle, Washington. The office will provide geoscience services and special projects along the west coast of North America, in Alaska, and worldwide. Services will include hydrographic services, geophysical services, soils engineering services, and physical oceanographic projects.

McGee is a Senior Engineer and Project Manager with more than 28 years of multidisciplinary engineering and applied research experience. His background includes managing innovative aquatic geophysical mapping programs for government and private clients. He was the founder of Global Remote Sensing.

The C & C West Coast Division can be contacted at 1-425-408-9190 or at the following address:

C & C Technologies, Inc.  
17706 Brickyard Road  
Bothell, WA 98011
