

Perry Slingsby Systems has entered into a tooling agreement with Scan Tech Ltd.

2005-05-20 13:35:32 by Rons_ROV_Links

Perry Slingsby Systems, an international provider of remote intervention technologies and equipment systems, has entered into an agreement with Scan Tech UK Ltd (a member of the Fisher Group) to offer an extensive range of Perry Slingsby Systems ROV tooling. Perry Slingsby Systems and Scan Tech will work together to ensure that the latest in ROV tooling is available to North Sea clients, meeting the evolving and expanding market for ROV Standard and Bespoke Tooling.

“A growing number of customers require the facility to rent quality ROV tooling products. To meet this emerging need our business model has been expanded beyond straight sales of ROV tooling systems and now includes a number of exclusive Tooling Rental Outlets. Scan Tech UK’s knowledge of equipment rental, reputation for service and support coupled with Perry Slingsby Systems extensive range of ROV deployed tools is the solution the North Sea market has been needing.” stated David Gillies, Tooling Sales Manager, Perry Slingsby Systems.

“Scan Tech UK is delighted to announce this strategic agreement with Perry Slingsby Systems. The addition of these advanced ROV tools and technologies is in direct response to client demands for more sophisticated subsea tooling and compliments our existing product range perfectly. All of our customers will be able to call off equipment from their usual contacts within Scan Tech and can rely upon our usual high standards of quality and responsiveness. In addition, this deal strengthens the existing links between Perry Slingsby Systems and the James Fisher Group” stated John Sands, Managing Director, Scan Tech UK.
