

HOS Dominator to work off Trinidad

2005-05-30 13:15:12 by Rons_ROV_Links

Saipem America Inc.'s *HOS Dominator* vessel spread is moving to the Port of Spain to support offshore pipeline installation off the southeastern coast of Trinidad.

Scope of work includes installing over 84 mattresses, touch down monitoring of pipe lay, and performing requisite as-built survey and ROV intervention tasks. Estimated project duration will be approximately 30 days.

Vessel spread is comprised of DP2 240 ft vessel, 36 tons A-frame with 4,000 ft of 1 1/2-in. wire, accommodations for 36 people, and a 100 hp heavy work class ROV system.
