

Total Contract Win for Bibby Offshore

2014-12-26 07:15:00 by ginamc

Bibby Offshore, the leading provider of subsea installation and inspection, repair and maintenance (IRM) services to the offshore oil and gas industry, today announces a multi-million pound contract award by Total E&P UK Limited ("Total") for services in the UKCS.

The project, including associated project management and engineering, will be carried out on the Ellon and Grant field, located 270 miles north-east of Aberdeen and in water depths of up to 135 meters.

The scopes will see Total utilise two of Bibby Offshore's vessels, the dive-support vessel ("DSV") Bibby Polaris and the construction support vessel ("CSV") Olympic Ares, to deliver the services between July and September 2015.

This is the latest of a series of subsea services that Bibby Offshore has undertaken for Total in the North Sea since 2003.

Barry MacLeod, Managing Director - UKCS, commented:

"We are delighted to be working with Total again to support their operations in the North Sea. Our longstanding relationship of over 10 years is a demonstration of our ability to consistently and successfully deliver complex and challenging projects for our clients."
