

## Fugro Inks Hydrographic Deal with CHS in Canada

2016-04-26 09:14:57 by DT\_Amanda

Fugro has been awarded a supply arrangement by the Canadian Hydrographic Service (CHS) to provide vessel based hydrographic survey services. Under the contract CHS will procure hydrographic surveys as needed, anywhere in Canada. Hydrographic survey data from ports, harbours, nearshore and offshore regions will be acquired and processed using Fugro's vessels, equipment and personnel. The resulting data will be used by CHS to update its nautical charts.
