

Savante Subsea LAUNCHES into 2017 with New Website

2017-01-11 16:44:44 by DT_Amanda

After two months of hard work and dedication, we are absolutely delighted to announce the launch of our brand new website!

Please come visit us at www.savante.co.uk The aim of our new website is to provide our visitors an easier way to learn about Savante subsea laser scanning services and solutions. It has been specifically designed to assist current and prospective project clients in identifying effective measurement solutions when responding to subsea asset integrity and measurement issues. The new website is interactive, enabling visitors to browse information based on their own choices and gives better access to case studies, news and our contact inquiry web pages.

Amidst the new features the site contains integrated social media buttons for Facebook, Twitter and LinkedIn to foster improved communication with clients. The case studies will highlight the projects we have completed and outline the value created for each client as a result. We will be constantly updating our content with helpful information, articles, blogs, newsletters, company announcements and client successes in the News section.

We hope you find the new website with a fresh look, easy to access information and we also wish to establish this portal as a source of information for those who visits our site.
