

ROVworld represents AC-ROV

2008-09-07 08:36:58 by jamesmc

World renowned internet-based information provider, ROVworld, has signed up with AC-CESS Co UK Ltd. as the latest AC-ROV distributor. Owners James and Gina McLauchlan are widely known in the Underwater Inspection and ROV industry and now represent AC-CESS and the AC-ROV. ROVworld has been a global ROV and Underwater industry news and information hub for many years; however, James and Gina felt that they were in a strong market position to add an ROV and Underwater Inspection hardware capability to their base in Portugal. After some considerable time surveying options in the micro-ROV market, they settled on the AC-ROV.

Following high market interest and a hectic demonstration schedule, ROVworld Lda has taken delivery of a second system. James said; "We are pleased that so much interest has been shown in the AC-ROV. Having a second unit onsite means that we can respond to market needs quickly, with a demonstration unit always available along with a second system on hand, should a customer require urgent delivery.

Gina spent training time with AC-CESS at their Aberdeen facility prior to James' visit, during which he collected the hand carry system in person. Callum Magee, Business Development Manager for AC-CESS, summed up the agreement "We are all very proud to be associated with a company as renowned and knowledgeable as ROVworld. It is a credit to all at AC-CESS and their parent company All Oceans Engineering that AC-CESS has secured its position as a leading global supplier of micro ROVs.
