

Ocean Modules delivers second V8 Sii HD inspection ROV

2008-10-16 10:00:00 by Rons_ROV_Links

Ocean Modules has recently delivered a V8 Sii HD remotely operated vehicle (ROV) to ROVTS from Korea. The V8 Sii HD (high definition) features the same 360° maneuverability and stability as the standard V8 Sii, but with a fiber-optic tether allowing longer and deeper inspections with breath-taking video quality. It also has a higher frame in order to accommodate larger cameras and other equipment.

Ocean Modules would like to extend a warm welcome to ROVTS as our first Korean customer.
