

Subsea well intervention cutter ROV-operable

2017-01-25 16:16:29 by DT_Amanda

[Webtool](#) has developed a resettable emergency disconnect cutter for light and medium [subsea well intervention](#).

This can be used either as part of a workover system or as a dedicated emergency disconnect package, and can be reset subsea by an ROV, avoiding the need to return the cutter to the surface vessel for this operation.
